

Harmony Endpoint – Licensing Instructions

- **These license instructions cover the following:**
 - Harmony Endpoint packages - Basic, Advanced, Complete and Data Protection.
 - Harmony Endpoint Add-Ons – XPR, Vulnerability & Posture Management, Threat Hunting.
- **Licensing:**
 - Check Point Harmony Endpoint is licensed per protected endpoint. An Endpoint is defined as a Computer Instance in the Check Point Endpoint Security End User License Agreement.
 - Licensed quantities are additive per package.
 - Annual packages can be used only for the period of the contract.
 - Each purchased package is accounted individually per the overall purchased quantity of that package.
 - Harmony Endpoint require Harmony Endpoint Management (EPM) for policy management. Cloud based management is included in the seat package license price. On-premise endpoint management capability is included with SmartCenter and is also available as an individual license.
 - Perpetual packages is available only for the Data Protection package.
- **Renewals:**
 - For annual package renewal please use the annual SKU with a "-RENEWAL" suffix (e.g. CPEP-DATA-RENEWAL-1Y)
- **Service:**
 - All endpoint annual subscription include Standard Support.
The included support can be either Direct or Collaborative - based on customer region and user-center account designation. Customers may upgrade the included Standard support to either Direct Premium or Collaborative Premium support.
- **Data Storage & Retention:**
 - Data Storage limitation is 40GB.
 - Data Retention is for 1 year.
 - Threat Hunting Data Retention is 7 days.
 - Threat Hunting Data Retention for XPR add-on is 30 days.
 - Threat Hunting Data Retention is also available for 1 Month, 1 Quarter and 1 year, by using the Threat Hunting Data Retention SKUs.
