

## **Title: End of Support for Non-Compliant Versions of Harmony Endpoint**

Dear Harmony Endpoint Security Customer,

### New U.S. Department of Commerce Regulations

As of June 14th 2024 and no later than by September 29th, 2024, US vendors are required to adhere to the US Department of Commerce regulations described in document 2024-13532 issued on June 14th, 2024. You can find more details about this decision here: <https://www.federalregister.gov/d/2024-13532/>

### Impact on Harmony Endpoint Customers

While recent Harmony Endpoint versions already comply with the US DoC regulations, some customers are still using versions which will be non-compliant as of September 29th 2024.

To ensure continued security and compliance, these customers must upgrade their products before the specified deadline.

Additional details can be found here: <https://support.checkpoint.com/results/sk/sk182464>

Both the compliant and non-compliant versions of Harmony Endpoint offer the same features and security level. Transitioning to a compliant version is seamless and will not impact your operations.

### Deadline for Upgrade: September 29th 2024

Check Point will end support for non-compliant Harmony Endpoint versions on September 29th, 2024, affecting both US and non-US customers.

### Check Point Support

We understand that this change may pose challenges, and as a valued customer, we are committed to supporting you during this transition. For any further questions, please contact our Technical Support or email us at [contact\\_support@checkpoint.com](mailto:contact_support@checkpoint.com).

Thank you for your understanding and cooperation as we implement this important update. Together, we will continue to provide exceptional solutions and service to our customers.
