

The properties of the Layer « Applications »

On the rule 1, the logs related have the field « Application Control » with an entry

The screenshot displays the Palo Alto Networks configuration interface. On the left, a navigation pane shows 'Access Control' > 'Policy' > 'Applications'. The main area shows the configuration for rule 1, 'Allow', which is applied to any source and destination, with any VPN. The 'Services & Applications' section is configured with 'Accept' action and includes 'Yahoo! Finance', 'Sports', and 'Gmail'. The 'Track' section is set to 'Log' and 'Accounting'. Below the configuration, the 'Logs' tab is active, showing a search bar and a table of log entries.

No.	Name	Source	Destination	VPN	Services & Applications	Action	Track	Install On
1	Allow	* Any	* Any	* Any	Yahoo! Finance Sports Gmail	Accept	Log Accounting	* Policy Targets
2	Monitoring application control	* Any	* Any	* Any	* Any	Accept	Log Accounting	* Policy Targets

On the rule 2, event we have a connection related to one application (Like Facebook or something else), regarding the logs related, the field « Application Control » is empty

The screenshot displays the Palo Alto Networks firewall configuration interface. On the left, the navigation pane shows 'Access Control' > 'Applications' selected. The main area shows rule configuration for rule 2, 'Monitoring application control'. The rule is configured with 'Any' for source, destination, and VPN, and 'Any' for services and applications. The action is 'Accept' with logging enabled. Below the rule configuration, the 'Logs' tab is active, showing a search bar and a table of log entries.

No.	Name	Source	Destination	VPN	Services & Applications	Action	Track	Install On
1	Allow	* Any	* Any	* Any	Yahoo! Finance Sports Gmail Evernote	Accept	Log Accounting	* Policy
2	Monitoring application control	* Any	* Any	* Any	* Any	Accept	Log Accounting	* Policy
