

RETHINK SECURITY MANAGEMENT

SIMPLIFY COMPLEXITY, UNIFY EVERYTHING
AND BRING ORDER TO CHAOS

Next
Generation
Policy

Efficient
Automated
Operations

Integrated
Threat
Management

OUR MISSION IS TO EMPOWER FORWARD-THINKING
ORGANIZATIONS WITH SIMPLE AND INTEGRATED SECURITY
MANAGEMENT THAT PROVIDES FULL-SPECTRUM
VISIBILITY INTO SECURITY RISK.

RETHINK POLICY

Better align security to keep pace with dynamic business and network environments. Next-generation policy now gives you the ability to have one policy for users, data, applications and networks providing unparalleled granular control and consistent security. Each policy can be segmented into manageable sections, or policy layers, to align with your network or business needs.

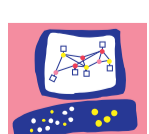

RETHINK OPERATIONS

Provide strong protection efficiently without impeding business innovation. Routine tasks can now be automated and delegated, empowering security self-service for business owners. Smart APIs enable trusted integrations with orchestration infrastructures, paving the way for fully automated security controls.

RETHINK VISIBILITY

Gain full-spectrum visibility into your security environment to prevent the next attack. With R80, threat management is fully integrated, with logging, monitoring, and even correlation and reporting in one place. The intuitive, visual dashboard provides full visibility into security across the network, helping you monitor security continuously and stay alert to potential threats.

PROVIDE YOUR TEAMS WITH EVERYTHING THEY NEED
TO DETECT AND RESPOND TO THREATS OF
TODAY AND TOMORROW.
