

CYBRARY

How to Build a Future-Proof Cybersecurity Skills Development Program

Wes Samuel

*Senior Vice President,
Global Sales*

CYBRARY

People Are Your First Line of Defense, but Gaps Persist

Process and tech are important, but **people** are crucial to mitigating risk and enabling growth

Cybersecurity workforce gap is estimated at 3.4 million workers, a **26% increase over 2021**

Your team feels the strain too: **70% of cyber workers feel they're not staffed to be effective**

From (ISC)² 2022 Cybersecurity Workforce study

Skills Development Programs Require a Holistic, Continuous Approach

Get Executive Buy-In and Organizational Alignment

Align to overarching business strategy and articulate positive impacts on org-wide goals

Secure support from trusted collaborators in other departments to start building momentum

The Classic Myth:

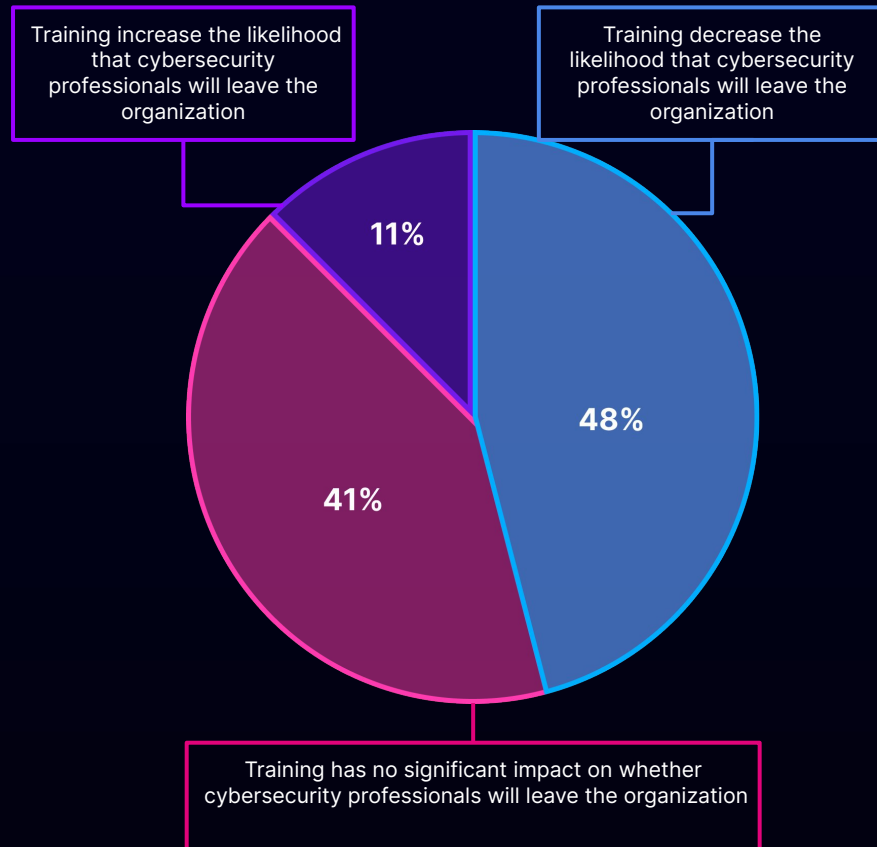

Training makes employees more likely to job-hop with their newly enhanced skills, increasing employee turnover.

Omdia research refutes the idea that training increases employee turnover

- **90% of respondents refuted the training myth**
- 48% said training decreases the likelihood of cybersecurity employee turnover
- Only 11% of respondents said training increases the likelihood of employee turnover

[“The Myths of Training Cybersecurity Professionals” - Omdia Research Report](#)

Support skills development at all levels with a full continuum of content

Career and Skills Development

Cover all major functions of a high-performance cybersecurity workforce:

- Defensive (Blue Team)
- Offensive (Red Team)
- Engineering and Ops
- Governance, Risk, and Compliance
- Leadership

Certification Prep

Provide support for the industry's most essential certifications, to help staff continue advancing

Mission Readiness

Build mission-ready skills with threat-informed content and advanced courses that help protect your organization

Seek platforms that provide a diverse mix of content for different learning styles

CYBRARY

CYBRARY | FOR TEAMS

2023

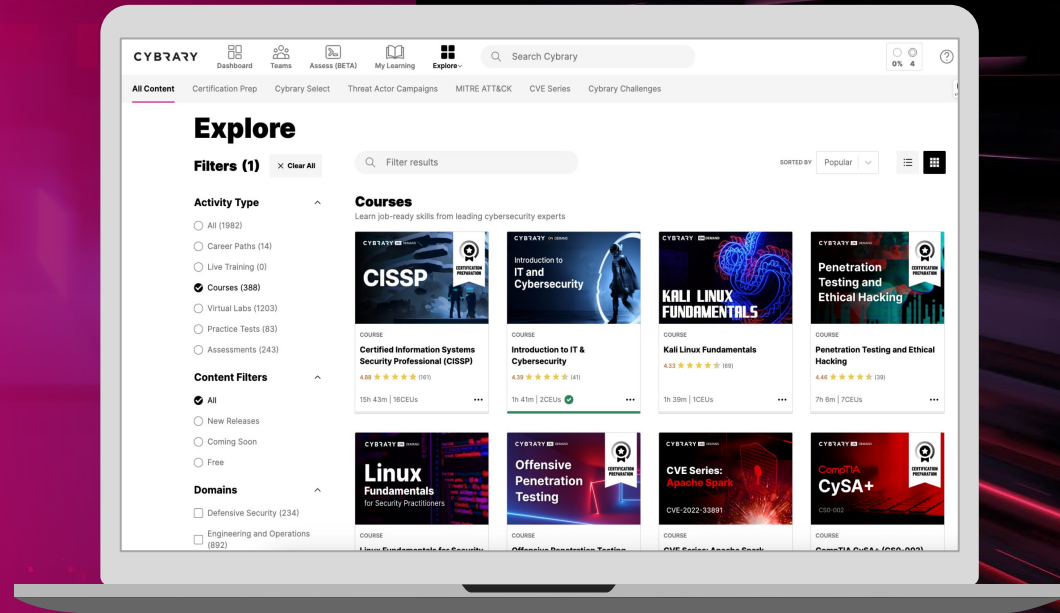

Leading Cybersecurity Skills Development Platform

Massive cyber-focused platform, with unmatched depth and breadth

- 2,000+ courses across the full spectrum of topics, to develop staff at all levels
- Expert-curated content
- Centralized and intuitive platform UX

A wide variety of content, laser-focused on hands-on, practical skills

- Video, text, multimedia, labs, and assessments to suit all learning styles
- Online instructor-led training (Cybrary Live)

Like a membership to the world's best gym, with access to elite personal trainers

CYBRARY FOR TEAMS

Self-Paced Learning

- Support for 43 key certifications, for staff at all levels
- Curated, on-demand course modules with video, text, and labs
- Practice tests to ensure staff is ready to ace the exam

CYBRARY LIVE

Live, Instructor-Led Training

- Tailored material for the needs of students in the session
- Small class sizes (25 attendee max) to maximize engagement
- Immediate feedback to clarify challenging concepts

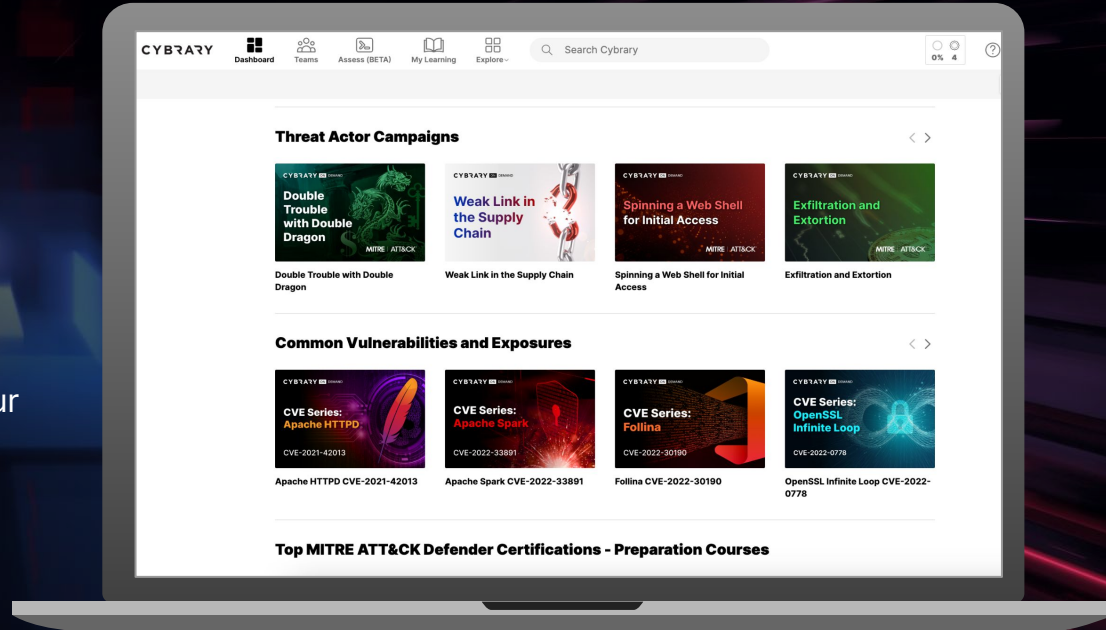

MISSION READINESS

Threat-Informed Content for Mission-Ready Skills

Threat Actor Campaign courses to prepare your team for real-world adversaries

Common Vulnerabilities and Exploits (CVE) courses for hands-on experience patching new vulnerabilities in a safe environment

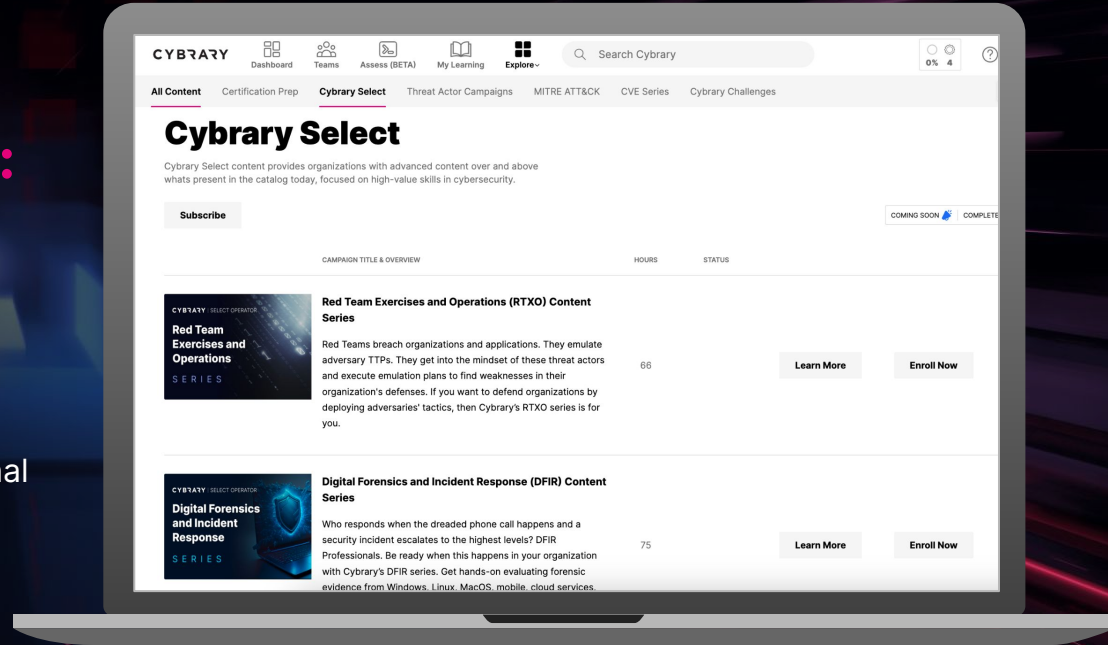

Introducing Cybrary Select: Advanced Content for the Most Impactful Skills

Courses covering the full spectrum of the highest-value skills, with in-depth tactics, techniques, and procedures and cross-functional collaboration and leadership

Exclusively available to Cybrary for Teams customers and included in all Teams accounts

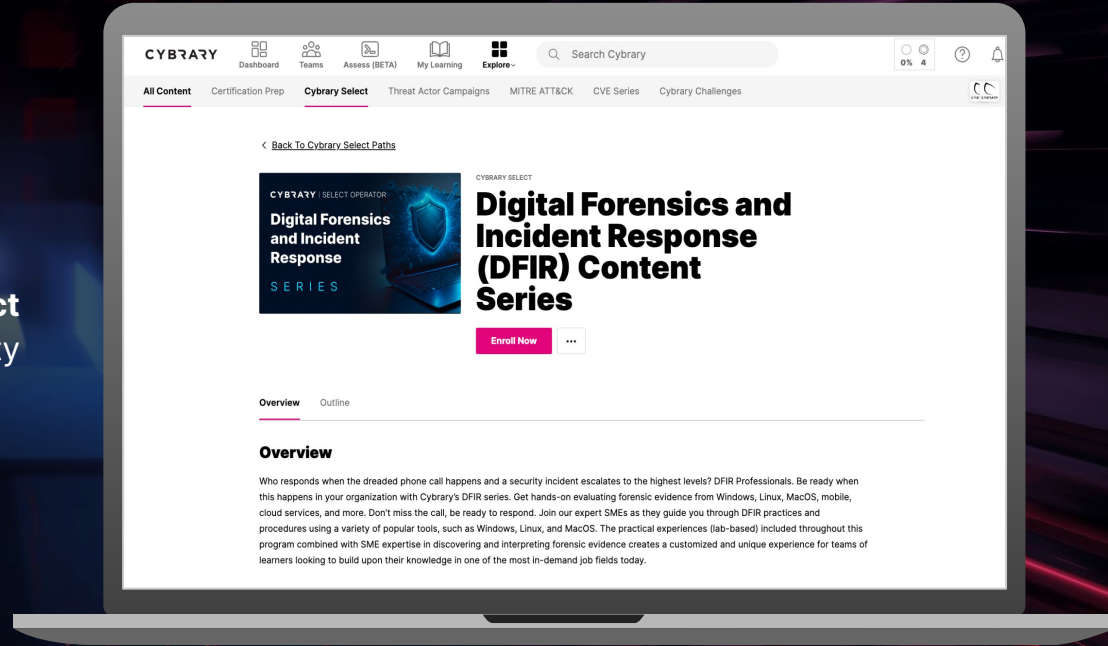

Digital Forensics and Incident Response (DFIR)

Our flagship advanced Blue Team **Cybrary Select** series, with a robust, advanced offensive security curriculum for intermediate to advanced staff:

- Forensics 101
- Incident Response Theory
- Mobile Forensics
- Cloud Forensics
- Legal Procedures

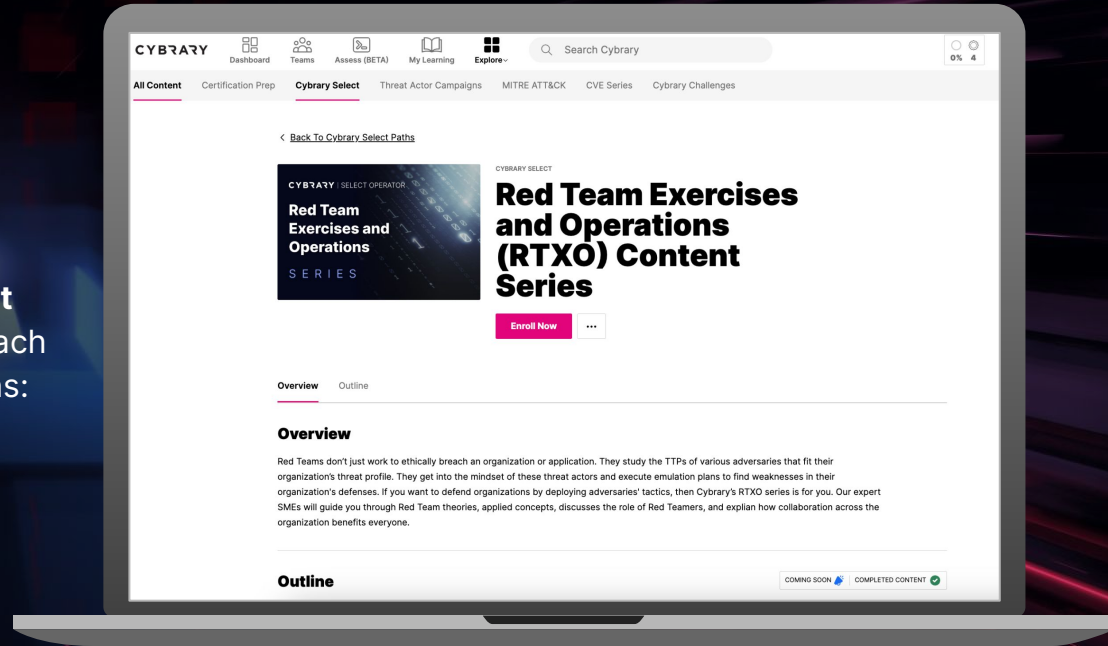

Red Team Exercises and Operations (RTXO)

Our flagship advanced Red Team **Cybrary Select** series, building advanced defensive skills to breach the target and succeed in more complex missions:

- Operations Planning
- Open Source Intelligence (OSINT)
- Breach Operations
- Post Exploitation
- Physical and Social Attacks
